#### **INFORMATION:**

#### A. Direct labour cost:

- Six workers were employed in production in 2021 and 2022.
- Each of them worked 1 840 hours normal time during the year at R40 per hour.
- The overtime register reflected a combined total of 230 hours worked at 1.6 times the normal time rate.
- Production staff received a production bonus of 8% of the normal time wages.

#### B. Factory overhead cost:

The bookkeeper calculated the factory overhead cost as R541 600.

However, he made the following errors, which must still be adjusted:

- He included the entire insurance expense of R32 500 to the factory overhead cost, instead of only 60% of this expense.
- He allocated R54 000 to factory water and electricity using the ratio 3:2:2 for factory, sales and office respectively. This expense should have been split in the ratio 2:1:1.

| Deposit dated 29 June 2022 | R12 800                                                               |
| EFT 297                    | R9 600                                                                |
| EFT 298                    | R12 300                                                               |

MARKING GUIDELINES

**MARKS: 150** 

#### **MARKING PRINCIPLES:**

- Unless otherwise stated in the marking guidelines, penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no penalty for misplaced item). No double penalty applied.
- 2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
- 3. Unless otherwise stated, give full marks for correct answer. If answer incorrect, mark workings.
- 4. If a pre-adjustment figure is shown as a final figure, allocate the part-mark as a working mark for that figure (not the method mark for the answer). **Note**: if figures are stipulated in memo for components of workings, these do not carry the method mark for final answer as well.
- 5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or sign or bracket is provided, assume that the figure is positive.
- 6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
- 7. If candidates provide more that the required number of responses, inspect all responses to give benefit to the candidate. Penalties may be applied for foreign entries if earning full marks not related to Q (max -2 per Q).
- 8. This memorandum is not for public distribution; as certain items might imply incorrect treatment. The adjustments made are due to nuances in certain questions.
- 9. Where penalties are applied, the marks for that section of the question cannot be a final negative.
- 10. Where method marks are awarded for operation, marker must inspect reasonableness of answer.
- 11. Operation means 'check operation'. 'One part correct' means operation and one part correct. Note: check operation must be +, -, x, ÷ as per candidate's calculation (if valid) or per memo.
- 12. In calculations, do not award marks for workings if numerator & denominator are swapped this also applies to ratios.
- 13. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part. Indicate with a⊠.
- 14. Be aware of candidates who provide valid alternatives beyond the marking guidelines. Note that one comment could contain different aspects.
- 15. Codes: f = foreign item; p = placement/presentation.

These marking guidelines consist of 10 pages.

## 1.2.2 Annie is concerned that fixed costs increased to R806 400. Explain why she should not be concerned. Provide TWO points. Quote figures.

TWO points  $\checkmark$   $\checkmark$  with comparative figures  $\checkmark$   $\checkmark$ 

The first two points must mention / imply economies of scale and may be combined for two valid points, with different comparative figures quoted.

- Economies of scale was achieved due to an increase in production by 1 150 units / from 5 250 to 6 400 / 21,9%
- Fixed costs <u>per unit</u> decreased by R25 / from R151 to R126 / by 16,6% (as fixed costs remain relatively stable / not influenced by the level of production)
- Total fixed cost increased by R13 650 / from R792 750 to R806 400 / by 1,7% which is below the inflation rate.

## 1.2.3 Comment on whether the production staff deserves the production bonus that they received. Provide THREE points, with figures.

THREE points  $\checkmark$   $\checkmark$  with figures (comparison)  $\checkmark$   $\checkmark$   $\checkmark$  Clear motivation for staff deserving the bonus; be alert to valid comments on why they do not deserve the bonus. Note that more than one point may be combined in a single statement e.g. Production and BEP Award marks accordingly.

POINT 1

- Production increased from 5 250 to 6 400 units / by 1 150 units / by 21,9%
- BEP decreased from 6 954 to 6 156 / by 798 units / by 11,5%
- The business <u>made a profit</u> on 244 units (or R31 964) compared to a loss on 1 704 units (or R194 256) last year.

POINT 2

- <u>Direct material cost per unit decreased</u> from R128 to R102 /by R26 / by 20,3%; an indication of good control / less wastage / efficiency in production / better training
- <u>Direct labour cost per unit decreased</u> from R95,00 to R76,82 / by R18,18 / by 19,1% (see 1.2.1 DLC); an indication that it is being well managed; meeting targets during normal time.

POINT 3

- Overtime was limited to only 230 hours / 12,5% of normal time / 11,1% of total hours spent in production (small proportion of time spent in production / saving the company on overtime rates)
- Decrease in total variable costs from R251 per unit to R244 / by R7,00 / 2,8%

1.2.4 Annie wants to improve her profit by R50 000 during the next financial year while maintaining costs. Calculate the <u>additional units</u> that must be produced to achieve this target.

3.4 Juanita is concerned about her decisions in October 2022 to adjust the mark-up % and the amount actually spent on advertising. Provide TWO points to indicate whether these were wise decisions or not. Quote figures and/or calculations.

ONE point on sales or gross profit ✓ figure/s ✓ ONE point on advertising ✓ figure/s ✓

POINT 1 The reduction in mark-up % led to:

- Sales of 4 390 units more than budgeted / from 7 080 units to 11 470 units / by 62%. OR sales exceeded the budget by R247 446 (from R584 100 to R831 546 or 42,4%)
- Gross profit is more than budgeted by R27 966 or 12,2% (from R230 100 to R258 066) / cost of sales was more than budgeted as expected, due to more sales (by R219 480)

POINT 2

Underspent on advertising by R12 000 (40 000 - 28 000) or by 30% was not significant as it did not affect sales negatively / budgeted figure was 6,8% of sales, but actual amount used was 3,4% of sales. It could be argued that sales could have been higher if more was spent

It could be argued that sales could have been higher if more was spent on advertising.

3.5.1 Explain why Juanita should be concerned about the actual amount spent on repairs and maintenance during October 2022. Quote a figure or a calculation.

Figure (comparison) ✓

Underspent on maintenance by R22 000 / spent only R8 000 of the R30 000 budget / 26,6% of the budget was used / 73,3% of budget was not used.

Explanation for concern ✓ accept short statements

This could affect the long-run productivity of the assets / neglecting maintenance may cause disruptions to operations / cash savings in the short-run may cause fixed assets to break down or deteriorate, leading to greater expenses in the future.

3.5.2 James feels that there has been a lack of control over the amounts spent on delivery expenses and packing material. Explain whether James' opinion is correct or not. Provide calculations.

Explanation (comparison with sales)  $\checkmark\checkmark$  Figures  $\checkmark\checkmark$  comparison of percentages or unit cost

award ONE mark if only comparative figures (variances) are used.

The delivery costs were well maintained; service provider was able to operate more efficiently in spite of increased sales:

# EXPLANATION ON DELIVERY EXPENSES

- Delivery cost per unit is R3,74 compared to the R4,95 budgeted.
- Budgeted for 6% of sales actual was 5,2% of sales
